VIVY Bugs

Project : vivy

IssueType : Bug

Summary : User is navigated to PIN entry page even with wrong password but no SMS appears

Description :

Steps to reproduce :

1) Navigate to the vivy login page

2) Enter registered email, wrong password and click Sign in button

Outcome : User is navigated to the PIN entry page where there is no SMS appeared under notifications.

Observation : When user enter correct password the SMS is generated but when entered wrong password it doesn't generate SMS (Intern user is clueless where it assume as entered valid password but no SMS generated)

Project : vivy

IssueType : Bug

Summary : Forgot password on Login page is only visible when the password field is empty

Description :

Steps to reproduce :

1) Navigate to the vivy login page

2) Enter registered email, wrong password and click Sign in button

Outcome : Since the wrong password still stays as is in the field, user may get confused where to find 'Forgot Password' option

Project : vivy

IssueType : Bug

Summary : Registration : Non context snackbar text appears when confirm code while use registering

Description :

Steps to reproduce :

1) Navigate to the vivy Registration page

2) Enter email and click continue

3) Enter some random code to verify the snacker text

Outcome : It appears to be expected snackbar text only for the first time. When user click continue for the 2nd time with wrong confirmation code the snackbar text becomes "This Confirmation code was already used"
